

```
 5 const SignIn = () => {
64
65
66
67
```

src > components > SignIn.jsx > SignIn

```
5 const SignIn = () => {
64
65
66
67
```

```
PS C:\Projects\coffee-store-client> git remote set-url origin https://github.com/ProgrammingHero1/coffee-store-client-with-auth.git
```

A screenshot of the Visual Studio Code (VS Code) interface. The top bar shows the file path: "src > components > SignIn.jsx". The search bar contains the text "coffee-store-client". The main editor area displays the following code:

```
5 const SignIn = () => {
64
65     <input type="password" placeholder="password"
66         name="password" className="input input-bordered"
67         required />
68     <label className="label">
69         <a href="#" className="label-text-alt link
70             link-hover">Forgot password?</a>
71     </label>
```

The code is part of a functional component named "SignIn". It includes an input field for a password and a label containing a link for forgot password.

The most similar command is

▲Vercel Documentation Guides Help Search... Feedback

Express.js is a popular server framework used with Node.js. In this guide, we will cover how to deploy an Express.js application to Vercel along with some additional topics you'll need to consider when adapting to a serverless environment.

Deploying on Vercel

Deploying an Express.js application on Vercel should require minimal or no code changes. Let's use the steps below to create a new Express.js project and deploy it to Vercel.

Using a Template

We have an [example of an Express project](#) that can be cloned and deployed to Vercel as your initial starting point.

Using an existing project

Before you get started, you will need to have Node.js installed and a [Vercel account](#) to complete all the steps.

1. Create a new project

In your terminal, create a new directory and initialize your project:

Activate Windows
Go to Settings to activate Windows.

Vercel

Vercel Documentation Guides Help Search... Feedback

6. Run your application locally

You can replicate the Vercel deployed environment locally by using the [Vercel CLI](#). This allows you to test how your application will run as if it were running on Vercel, even before you deploy.

To get started, you need to install the Vercel CLI by running the following command in your terminal.

```
1 npm i -g vercel
```

Next, login to Vercel to authorize the Vercel CLI to run commands on your Vercel account.

```
arrifat011@gmail.com
```

```
1 vercel login
```

Now you use the local development command, which will also execute the `vercel.json` configuration you created above.

```
1 vercel dev
```

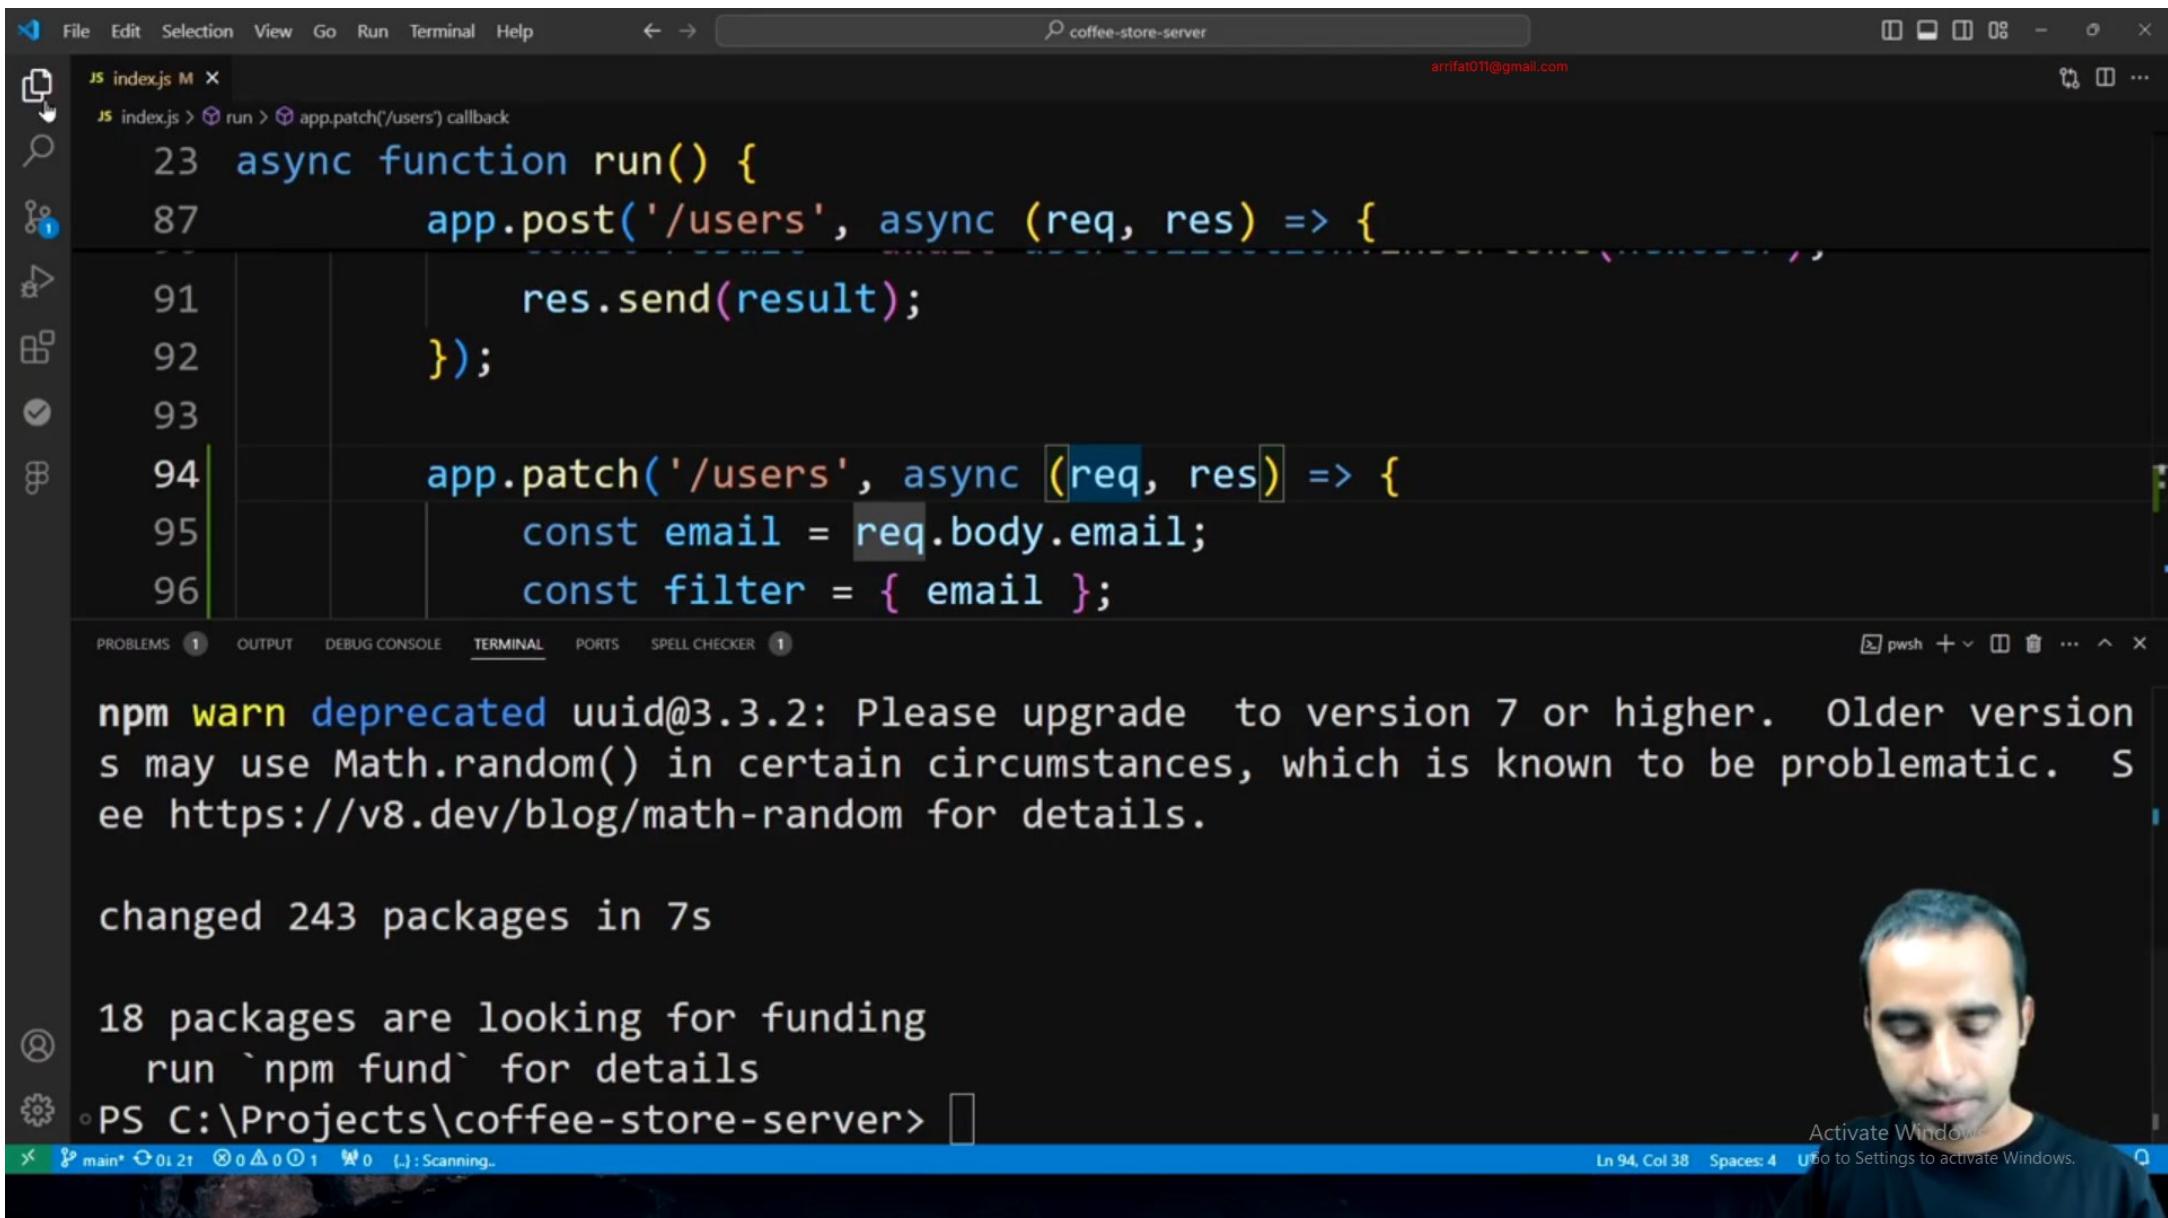

Activate Windows
Go to Settings to activate Windows.

```
23  async function run() {
87      app.post('/users', async (req, res) => {
91          res.send(result);
92      });
93
94      app.patch('/users', async (req, res) => {
95          const email = req.body.email;
96          const filter = { email };
```

```
PS C:\Projects\coffee-store-server> npm i -g vercel
```

A screenshot of a Microsoft Visual Studio Code (VS Code) interface. The main area shows an open file named "index.js". The code is written in JavaScript and defines an "app.post" and an "app.patch" route for handling user data.

```
File Edit Selection View Go Run Terminal Help
JS index.js M X
JS index.js > run > app.patch('/users') callback
23 async function run() {
87     app.post('/users', async (req, res) => {
91         res.send(result);
92     });
93
94     app.patch('/users', async (req, res) => {
95         const email = req.body.email;
96         const filter = { email };
```

The terminal below the editor shows npm output:

```
npm warn deprecated uuid@3.3.2: Please upgrade to version 7 or higher. Older versions may use Math.random() in certain circumstances, which is known to be problematic. See https://v8.dev/blog/math-random for details.

changed 243 packages in 7s

18 packages are looking for funding
  run `npm fund` for details
PS C:\Projects\coffee-store-server>
```

The status bar at the bottom of the VS Code window displays the current file path, line number, column number, and spaces used.

A screenshot of a developer's workspace. At the top, a dark-themed code editor shows a file named `index.js` with the following code:

```
23  async function run() {
87      app.post('/users', async (req, res) => {
92          });
93
94      app.patch('/users', async (req, res) => {
95          const email = req.body.email;
96          const filter = { email };
97          const updatedDoc = {
```

The code editor interface includes icons for file operations, search, and navigation, along with tabs for PROBLEMS, OUTPUT, DEBUG CONSOLE, TERMINAL, PORTS, and SPELL CHECKER. Below the editor, the terminal window displays the following output:

```
npm warn deprecated uuid@3.3.2: Please upgrade to version 7 or higher. Older versions may use Math.random() in certain circumstances, which is known to be problematic. See https://v8.dev/blog/math-random for details.

changed 243 packages in 7s

⑧ 18 packages are looking for funding
  run `npm fund` for details
⚙️ ⚙️ PS C:\Projects\coffee-store-server> vercel logout
```

The terminal also shows a message from `arrifat011@gmail.com`. The status bar at the bottom provides build statistics: 8 main files, 0 1st party dependencies, 0 0 dependencies, 0 0 0 dependencies, and a note that it is "Scanning..". It also includes the current line and column position (Line 94, Col 38), the number of spaces (Spaces: 4), and a link to "Go to Settings to activate Windows".

A screenshot of the Visual Studio Code interface. The title bar shows "File Edit Selection View Go Run Terminal Help" and a search bar with "coffee-store-server". The left sidebar has icons for file, search, and other tools. The main editor area shows the following code:

```
JS index.js M X
JS index.js > run > app.patch('/users') callback

23  async function run() {
87      app.post('/users', async (req, res) => {
92          });
93
94      app.patch('/users', async (req, res) => {
95          const email = req.body.email;
96          const filter = { email };
97          const updatedDoc = {
```

Vercel Documentation Guides Help

Search... Feedback

- Return `Express on Vercel` when it's called
- And start the Express.js server running on port `3000`

5. Configure your project for Vercel

By using a `vercel.json` file, you can control how Vercel configures your application.

For our application, we're going to tell Vercel to route all incoming requests to our `/api` folder.

To configure this, create a `vercel.json` file in the root of your project and add the following code:

```
1 { "version": 2, "rewrites": [{ "source": "/(.*)", "destination": "/api" }]} 
```

6. Run your application locally

You can replicate the Vercel deployed environment locally by using the Vercel CLI. This allows you to test how your application will run as if it were running on Vercel, even before you deploy.

To get started, you need to install the Vercel CLI by running the following command in your terminal.

```
1 npm i -g vercel
```

Activate Windows
Go to Settings to activate Windows.

OUTLINE TIMELINE

main* 0 1 21 0 0 △ 0 0 1 0 0 : Scanning... Ln 7, Col 10 Spa

The screenshot shows a Microsoft Windows desktop environment with a terminal window open. The terminal window has a dark theme and displays the following text:

```
PS C:\Projects\coffee-store-server> vercel --prod
Vercel CLI 39.1.2
? Set up and deploy "C:\Projects\coffee-store-server"? (Y/n) [
```

The terminal window is titled "node" and has a tab bar with "node" selected. The background of the desktop shows a blurred image of a person's face.

The screenshot shows the VS Code interface with the following details:

- File Explorer:** Shows the project structure under "COFFEE-STORE-SERVER". The "vercel.json" file is selected.
- Editor:** Displays the content of the "vercel.json" file:

```
1  {
2    "version": 2,
3    "builds": [
4      {
5        "src": "./index.js",
6        "use": "@vercel/node"
7      }
8    ],
9    "routes": [
```
- Status Bar:** Shows "coffee-store-server" in the title bar, and "node" in the bottom right corner.
- Bottom Bar:** Includes tabs for PROBLEMS, OUTPUT, DEBUG CONSOLE, TERMINAL, PORTS, and SPELL CHECKER.

```
PS C:\Projects\coffee-store-server> vercel --prod
```

Vercel CLI 39.1.2

? Set up and deploy “C:\Projects\coffee-store-server”? (Y/n) y

The screenshot shows the Visual Studio Code interface with the following details:

- File Explorer:** On the left, it shows the project structure under 'COFFEE-STORE-SERVER'. The files listed are: node_modules, .env, .gitignore, index.js (marked as modified), package-lock.json, package.json, and vercel.json (marked as untracked).
- Code Editor:** The main area displays the 'vercel.json' file content. The code is as follows:

```
1  {
2      "version": 2,
3      "builds": [
4          {
5              "src": "./index.js",
6              "use": "@vercel/node"
7          }
8      ],
9      "routes": [
```

The code editor has syntax highlighting for JSON and JS files. The status bar at the bottom indicates there are 1 problem and 1 untracked file.

```
PS C:\Projects\coffee-store-server> vercel --prod
Vercel CLI 39.1.2
arrifat011@gmail.com
? Set up and deploy "C:\Projects\coffee-store-server"? yes
? Which scope should contain your project? (Use arrow keys)
> jhankar557's projects
```

A screenshot of a Microsoft Visual Studio Code (VS Code) interface. The main area shows an open file named 'vercel.json' with the following content:

```
1  {
2      "version": 2,
3      "builds": [
4          {
5              "src": "./index.js",
6              "use": "@vercel/node"
7          }
8      ],
9      "routes": [
```

The 'TERMINAL' tab at the bottom is active, showing the command-line output of the Vercel CLI:

```
PS C:\Projects\coffee-store-server> vercel --prod
Vercel CLI 39.1.2
? Set up and deploy "C:\Projects\coffee-store-server"? yes
? Which scope should contain your project? jhankar557's projects
? Link to existing project? (y/N)
```

The status bar at the bottom indicates the file is 'Scanning...'.

The screenshot shows the Visual Studio Code interface with the following details:

- File Explorer:** On the left, it shows a tree view of the project structure under "COFFEE-STORE-SERVER". The files listed are index.js, package.json, .env, .gitignore, package-lock.json, package.json, and vercel.json (which is currently selected).
- Search Bar:** At the top center, it says "coffee-store-server".
- Code Editor:** The main area displays the "vercel.json" file content:

```
1  {
2      "version": 2,
3      "builds": [
4          {
5              "src": "./index.js",
6              "use": "@vercel/node"
7          }
8      ],
9      "routes": [
```
- Bottom Status Bar:** Shows tabs for PROBLEMS (1), OUTPUT, DEBUG CONSOLE, TERMINAL, PORTS, and SPELL CHECKER (1). It also includes icons for node, +, and other terminal-related functions.

```
PS C:\Projects\coffee-store-server> vercel --prod
Vercel CLI 39.1.2
? Set up and deploy "C:\Projects\coffee-store-server"? yes
? Which scope should contain your project? jhankar557's projects
? Link to existing project? (y/N) n
```

The screenshot shows the Visual Studio Code interface with the following details:

- File Explorer:** On the left, it shows the project structure under 'COFFEE-STORE-SERVER'. The files listed are: node_modules, .env, .gitignore, index.js (marked as modified), package-lock.json, package.json, and vercel.json (marked as untracked).
- Search Bar:** At the top center, it says "coffee-store-server".
- Code Editor:** The main area displays the 'vercel.json' file content:

```
1  {
2      "version": 2,
3      "builds": [
4          {
5              "src": "./index.js",
6              "use": "@vercel/node"
7          }
8      ],
9      "routes": [
```
- Bottom Status Bar:** Shows tabs for PROBLEMS (1), OUTPUT, DEBUG CONSOLE, TERMINAL, PORTS, and SPELL CHECKER (1). It also includes icons for node, +, and other terminal-related functions.

```
PS C:\Projects\coffee-store-server> vercel --prod
```

Vercel CLI 39.1.2

? Set up and deploy “C:\Projects\coffee-store-server”? yes

? Which scope should contain your project? jhankar557's projects

? Link to existing project? no

? What's your project's name? (coffee-store-server)

The screenshot shows the Visual Studio Code interface with the following details:

- File Explorer:** On the left, it shows a tree view of the project structure under "COFFEE-STORE-SERVER". The "vercel.json" file is selected.
- Search Bar:** At the top center, it says "coffee-store-server".
- Code Editor:** The main area displays the "vercel.json" file content:

```

In 7 Col 10 Spz

A screenshot of a Microsoft Visual Studio Code interface showing a project named "COFFEE-STORE-SERVER". The "vercel.json" file is open in the editor, displaying configuration for a Vercel deployment:

```
1  {
2      "version": 2,
3      "builds": [
4          {
5              "src": "./index.js",
6              "use": "@vercel/node"
7          }
8      ],
9      "routes": [
```

The terminal below shows the command being run:

```
PS C:\Projects\coffee-store-server> vercel --prod
```

Vercel CLI 39.1.2

```
? Set up and deploy "C:\Projects\coffee-store-server"? yes
? Which scope should contain your project? jhankar557's projects
? Link to existing project? no
? What's your project's name? coffee-store-server
? In which directory is your code located? ./
```

At the bottom of the terminal window, there is a message: "Activate Windows Go to Settings to activate Windows."

File Edit Selection View Go Run Terminal Help coffee-store-server

Deploying jhankar557s-projects/coffee-store-server

A screenshot of a Microsoft Visual Studio Code (VS Code) interface. The top navigation bar includes File, Edit, Selection, View, Go, Run, Terminal, and Help. A search bar at the top right contains the text "coffee-store-server". The left sidebar shows a file tree with a project named "COFFEE-STORE-SERVER" containing files like .vercel, .env, index.js, package-lock.json, package.json, and vercel.json. The "TERMINAL" tab is active, showing a command-line session:

A screenshot of a code editor (VS Code) showing a file named `SignIn.jsx`. The code is a functional component definition:

```
5 const SignIn = () => {  
  // ...  
  68  
  69    <div className="form-control mt-6">  
  70      <button className="btn btn-primary">Sign In</button>  
  71    </div>
```

The editor interface includes a top bar with File, Edit, Selection, View, Go, Run, Terminal, Help, and a search bar. Below the search bar is a tab bar with files like `SignIn.jsx`, `SignUp.jsx`, `Users.jsx`, etc. On the left, there are several icons for file operations. At the bottom, there are tabs for PROBLEMS, OUTPUT, DEBUG CONSOLE, TERMINAL (which is active), PORTS, and SPELL CHECKER. The status bar at the bottom shows the current file is `main*`, with scanning information and coordinates (Ln 72, Col 89).

A screenshot of a code editor showing a file named `SignIn.jsx`. The code defines a `SignIn` function that returns a JSX component. The component consists of a `<div>` element containing a `<button>` element with the text "Sign In". The code editor has a dark theme and shows line numbers from 5 to 71. The status bar at the bottom indicates the file is 60 lines long and has 27 changes.

```
5 const SignIn = () => {
  ...
  68
  69
  70      <button className="btn btn-primary">Sign In</button>

User Management System Project

Sub_Task-1: View all users (তোমার যেভাবে ইচ্ছা সেভাবে UI design করলেই হবে)

The screenshot shows a user management application interface. At the top, there is a green header bar with the text "User Management System". Below the header, there is a small decorative icon. On the left side, there is a button labeled "New User" with a user icon. In the center, there is a table with the following data:

ID	Name	@Email	Gender	Status	Action
1	Prathmesh Asole	18prathmeshasole@gmail.com	Male	Inactive	
2	Athary Asole	aezstx@g.in	Male	Active	

At the bottom of the video player, there is a progress bar showing "0:40 / 4:33" and various control icons. On the right side of the video player, there is a watermark for "Activate Windows" with the text "Go to Settings to activate Windows." and a Microsoft logo.

This screenshot shows a web-based application interface for managing user data. A modal dialog box is centered on the screen, displaying the message "Data Inserted Successfully!" with an "OK" button. The background shows a form with fields for Name (Jaya Dakhale), Email (jaya@gmail.com), Gender (Female), and Status (Active). Below the form is a large "Save" button. At the bottom of the page, there is a watermark for "arrifat011@gmail.com". The browser's address bar shows a Google Docs URL. The top of the browser window has a tab bar with various project names like "Module Details", "Vite + React", and "Authenticate". A navigation bar with icons for back, forward, search, and refresh is visible at the very top.
